By the end of May, other events of developmental significance had occurred. First, the Library's Community-wide document coding scheme, now officially called the Intelligence Subject Code (ISC), was in experimental operation. Early in ~~March~~ May of 1948, the system planners had finally concluded that the document classification scheme

Approved For Release 2000/08/17 : CIA-RDP84-00951R000200200024-4

Approved For Release 2000/08/17 : CIA-RDP84-00951R000200200024-4

had crystallized to a degree that justified its use on a trial basis and that the Intelligence System — that is the ISC and the necessary hardware then under development — gave reasonable promise of producing a satisfactory mechanical solution to the requirement problem. On 15 March 1948, the first edition of the Intelligence Subject Code Manual was published

Approved For Release 2000/08/17 : CIA-RDP84-00951R000200200024-4

Approved For Release 2000/08/17 : CIA-RDP84-00951R000200200024-4

and in [illegible] the Library
the ISC began acquiring intelligence
documents and the
preparation of descriptive
abstracts for selected
documents. Pending
the development of the
Intelligence Hardware, the
indexed documents were
stored manually. In brief,
the Intelligence Subject Code
of ISC was a six-digit
numerical scheme developed by OCD with IAC,
(later)
ORE and OSI cooperation,

the flow of incoming documents.

The second significant development in early 1945 was the first official assignment of a Community-wide reference responsibility to the new Office of ... Collection and Dissemination. On 25 May the National Security Council issued NSCID No. 5 which formally delegated to CIA -- that is, to OCD's Biographic Register -- primary responsibility for the maintenance of data

Approved For Release 2000/08/17 : CIA-RDP84-00951R000200200024-4

Approved For Release 2000/08/17 : CIA-RDP84-00951R000200200024-4

on foreign scientists and technicians. To this assignment would remain the only formally-delegated Community reference responsibility for OCD and its successor organizations.

By mid-1945, OCD's growth impetus had accelerated noticeably. Its divisions' operating procedures had been improved to the point where they were all functioning effectively. In addition, the Agency's

beginning to achieve the functional effectiveness that comes with experience. After its late start, for example, the Register, with 24 people, handled over 1400 requests for still pictures and motion picture film during fiscal 1949. Within its field of responsibility -- preparing biographic reports and providing other types of biographic support -- the Biographic Register
